Boeing Chosen for US Government's COMSATCOM Services Acquisition Program

- *Customers can select Boeing as provider of fixed and mobile satellite services through GSA Schedule*
- *Offerings include military Ka-band and UHF and commercial Ku-, L- and Ka-band services*

EL SEGUNDO, Calif., September 12, 2012 – The Boeing Company [NYSE: BA] announced today that Boeing Commercial Satellite Services has been approved as a service provider for the Future COMSATCOM Services Acquisition program. With this approval by the Defense Information Systems Agency (DISA) and General Services Administration (GSA), Boeing is authorized to provide U.S. government customers satellite communications services through a variety of fixed and mobile transponder and subscription services. Boeing's service offerings include military unique services such as UHF and Yahsat's military Ka-band, commercial services in the Ku, and Ka bands, as well as Inmarsat L-band and Thuraya L-band.

"This program gives Boeing another way to provide customers with exceptional satellite communication services using a variety of frequencies, including Inmarsat-5 Ka-band services," said Craig Cooning, CEO of Boeing Satellite Systems International. "Boeing continues to support the government's increasing need for satellite communications bandwidth."

Customers can procure these services under Boeing's GSA Schedule 70 contract.

Boeing Commercial Satellite Services, a unit of Boeing Satellite Systems International, works with owners of active satellite systems to market available bandwidth to prospective customers and to include hosted payloads on spacecraft. Boeing's enterprise-wide technology portfolio and expertise in government
